BVD INFORMATION

Females must have completed a full course of BVD vaccination prior to being served and if not from an accredited herd they must have blood tested antigen negative. Bulls must have completed a full course of BVD vaccination and if not from an accredited herd they must have tested antigen negative.

GENERAL CONDITIONS

Any females sold as in-calf **must** be accompanied by a valid P.D certificate which will be given to the auctioneers either with the entry form or the passport prior to the sale. This will be checked by the stewards.

Females sold as A.I'd should be accompanied by a service certificate. The service sire and dates must be stated on the entry form for females sold as running with the bull

Any animals not conforming to the standards laid down by the society will be re-classified and sold in the appropriate section of the sale.

Any vendor declaring the health status of their animals must provide the Society with a signed declaration and a copy of their health certificate where appropriate.

The society will process the transfers following the sale. Please note vendors are now responsible for the payment of transfer fees and therefore this shall be deducted from the vendor's cheque at the time of sale. (Transfer fee £12 including VAT)

T.B. TESTING

Please note that in line with Scottish Government legislation, all animals entered from a TB1 or TB2 area will require a pre-movement TB test within 30 days prior to the movement to Scotland. This also applies to any animal that has been in a TB1 or TB2 area (ie gone to a show) since the 18th May 2024. Post movement requirements are still between 60 and 120 days.

Buyers have approached the Society to request that we ask vendors to TB test their entries within 30 days prior to the sale as this would give buyers confidence to buy. As a Society we would like to strongly recommend that vendors voluntary TB test their entries for the sale and state this on the form at time of entry as we feel this would encourage and give confidence to buyers.

SEMEN TESTING

Buyers have approached the Society to request that we ask vendors to Semen test any bulls prior to the sale and state this on the form so that it can be included in the catalogue, and this would give confidence to both the buyer and the vendor.

BLUE TONGUE

Castle Douglas is now in a Bluetongue Restricted Zone (RZ).

The Belted Galloway Cattle Society is unable to give a definitive answer to the current bluetongue rules, and we have been advised that everyone who enters cattle should visit the government website for guidance as the situation/rules keep changing. We advise you to take advice from your vet.

This is the link to the Scottish Government website.

[Bluetongue movement restrictions for animals - Bluetongue: how to spot and report the disease - gov.scot](https://www.gov.scot/topics/animal-health-and-welfare/bluetongue)

Vaccination

Vaccination is the best way to protect animals from BTV-3 and is a key part of our disease control strategy along with movement controls. Talk to your private vet about whether vaccination is right for your herd.
